

WORKING DOG TRAINING LOG

# K9LogTracer

RESCUE

IRO

FCI

CINOTECNIA

MONDIORING

IGP

AGILITY

## The team's working file. Rescue, sport, and unit.

For handlers, instructors, clubs, security forces, NGOs, civic associations, and schools working IRO, FCI, CINOTECNIA, Mondioring, IGP, or Agility — or their own test hierarchy.

[k9logtracer.com](https://k9logtracer.com)

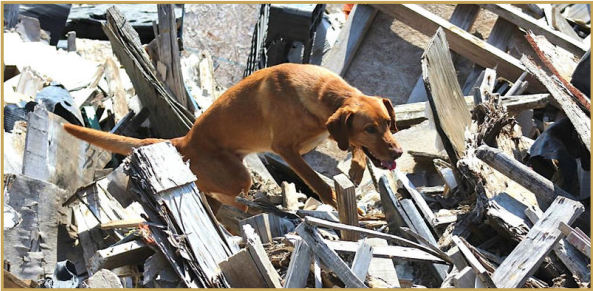

7-day trial · no card required

TWO WORLDS. ONE STANDARD.

Metrics a notebook cannot hold.

In rescue and in sport the craft already separates what the dog does on the field from what it does on an operation. K9LogTracer keeps that reading: score against the standard maximum, average, pass rate, and how many tests in the level were actually run.

RESCUE · IRO / FCI

**Obedience and operational work**

- Two blocks, not a single average: Obedience & Dexterity versus Operational Work.
- Points, mean, and pass rate per block. You see what carries the team and what is compensating.
- Only executed tests count. A partial session does not inflate the level or hide a gap.
- Rubble, structures, tracking, and water sit on the same team record.
- The report organizes the training week. It does not replace the trial evaluator.

SPORT · FCI

**Mondioring, IGP, and Agility**

- IGP: tracking, obedience, and protection are logged as sections of the same standard — not loose notes.
- Mondioring: FCI program levels and exercises, scored against each test's maximum.
- FCI Agility: the session is dated to the team, with what to improve and what to keep.
- The same dog can hold sport and rescue without mixing rulebooks.
- The club sees IGP, Mondioring, and Agility in one unit, each on its own scale.

WHAT THE REPORT SHOWS

Score

An integer against that test's standard maximum.

Average

Mean of what was trained, not the level's theoretical total.

Pass rate

How much of the block closes above the threshold.

Coverage

How many tests in the level were actually run.

THE ORGANIZATION CHOOSES THE SCALE

Use the preloaded tests or build your unit’s own working hierarchy.

Start with CINOTECNIA, IRO, or FCI already loaded, or build the scheme for your club, security force, NGO, civic association, or school. Both paths coexist: you do not have to transcribe a rulebook or drop how the organization already works.

**CINOTECNIA**

A working scheme ready on day one, with the reading the local craft already uses.

**IRO / FCI**

International reference certifications, levels, and tests for rescue and sport. The same test means the same thing across years.

**Your own**

Add your organization's rulebook. Each test carries its maximum and category, so scores stay comparable.

**IRO / FCI BREED CATALOG**

**The dog record uses the craft's nomenclature.**

IRO- and FCI-recognized breeds, ready to assign to the team. No more writing the same breed three different ways.

**PATH 1**

**Preloaded tests**

- CINOTECNIA ready for the first log entry.
- IRO and FCI as the rescue and sport reference.
- Other working standards already available.
- Start logging sessions without building the tests by hand.

**PATH 2**

**Your own hierarchy**

- The organization builds its working-test hierarchy.
- Each test sets a maximum and a category.
- It sits alongside IRO, FCI, and CINOTECNIA.
- Club, force, NGO, association, or school: the internal rulebook lives in the unit.

CHOOSE BY ROLE. PRICING IS ON THE SITE.

## Three plans. Core features.

No figures here: current pricing is on [k9logtracer.com](https://k9logtracer.com). What does not change is the scope of each plan.

### INSTRUCTORS IN THE ORGANIZATION

An organization can have instructor members. The instructor evaluates every team in the unit: the session stays on the handler's record, with the evaluator's name on it.

#### THE TEAM

##### HANDLER PLAN

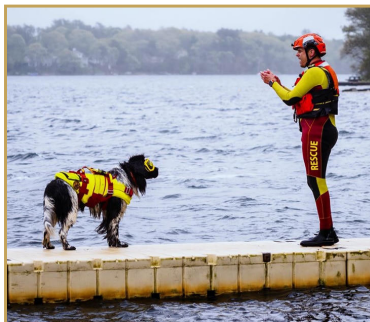

- Dated session log.
- Test-by-test evaluation.
- Dog record with IRO / FCI breeds.
- Preloaded tests: CINOTECNIA, IRO, FCI, and others.
- Session report to download or send.
- Dogs in your charge. No organization admin.

#### THE UNIT

##### DIRECTOR PLAN

- Create and run the organization.
- Members, join requests, and roles.
- Instructors who evaluate every team.
- Your own test hierarchy, plus the preloaded ones.
- Unit reports: status colors and reading by handler.
- Built for who leads — not for logging their own dog.

#### UNIT AND TEAM

##### HANDLER + DIRECTOR

- Run the organization and keep dogs in your charge.
- Log and evaluate your own teams.
- Add instructors who evaluate the whole unit.
- Use preloaded tests or your own scheme.
- See the unit and your team's record without mixing them.
- For who trains and also leads the club or the force.

### Try it for 7 days. No card.

Clubs · Security forces · NGOs · Civic associations · Schools. Full features, with a real dog. Each plan's price is on the site.
